PROFESSIONAL SUMMARY

Software Engineering student (B.E., Information Science & Engineering, 9.22 CGPA) with strong Data Structures & Algorithms fundamentals and hands-on experience in Python, Java, REST APIs, and MySQL. Comfortable working across the stack — from schema design to API debugging to automated system logic — and eager to build production-grade backend and systems skills through a high-ownership internship.

TECHNICAL SKILLS

Languages: Python, C, JavaScript

Database: MySQL, SQL (schema design, CRUD & query optimization)

Frontend: React.js, HTML, CSS, Bootstrap

Tools: Git/GitHub, VS Code, XAMPP

Concepts: Data Structures & Algorithms, Debugging & Testing

Backend: REST APIs, Node.js, API integration & debugging

PROJECTS

• Pet Shop Management System

Engineered a full-stack inventory and customer management system supporting [X]+ product records, as measured by zero data-integrity failures across manual CRUD test cases, by designing a normalized MySQL schema and debugging JavaScript-driven REST endpoints for real-time inventory sync.

• Graphical Password Authentication System

Built a graphical password authentication system to replace vulnerable text-based logins, as measured by successfully validating [X] distinct click-sequence edge cases during testing, by architecting a React.js frontend and debugging state-management logic for input capture and session handling.

• Accident Detection System (Arduino + IoT)

Developed an IoT-based real-time accident detection and alert system, as measured by [X]-second average detection-to-notification latency, by integrating sensor hardware, writing automated notification logic, and debugging false-positive trigger conditions.

• First Aid Information Web App

Built a structured first-aid guidance web application covering [X] emergency scenarios, as measured by [X]% reduction in steps-to-find-information during self-testing, by architecting content flow and building a responsive HTML/CSS interface with cross-browser testing.

EDUCATION

• B.E. – Information Science & Engineering

BGS Institute of Technology, Bellur Cross | 2023 – Present | CGPA: 9.22

• PUC – PCMB

Global Mahesh P U College, Mandya | 2023 | 90.66%

• SSLC

Kittur Rani Chennamma Residential School, Besagarahally | 2021 | 93.28%

SOFT SKILLS

- Analytical & problem-solving mindset
- Quick learner, comfortable with ambiguity and independent debugging
- Clear written & verbal communication; proactive when blocked
- Collaborative, team-oriented, and accountable for ownership of tasks

LANGUAGES

- Kannada
- English
- Hindi
